

Uladzislau Batashou

Senior Frontend Engineer

Minsk, Belarus (open to relocation and remote work)

Email: batashof@gmail.com • Phone: +375 25 763-06-95 • LinkedIn: linkedin.com/in/uladzislau-batashou-23462b155

PROFESSIONAL SUMMARY

Senior Frontend Engineer with 8+ years of experience building responsive, high-performance web applications with React, TypeScript, and Next.js (SSR, ISR). Deep expertise in frontend architecture, state management (Redux Toolkit, TanStack Query), REST and GraphQL API integration, performance optimization, web accessibility (WCAG), and automated testing (Jest, React Testing Library, Cypress). Currently the sole frontend engineer on a production B2B fleet-management SaaS, owning frontend architecture and delivery end to end. Experienced in Agile cross-functional teams, code review, and mentoring.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript

Frameworks & Libraries: React (incl. React 19), Next.js (SSR, ISR), React Router, React Hook Form

State & Data: Redux Toolkit, TanStack Query, Apollo GraphQL

APIs: REST, GraphQL, WebSockets, Socket.io, OpenAPI (Orval code generation)

Markup & Styling: HTML5, CSS3, SCSS, Tailwind CSS

UI Libraries: Material UI, MUI X Data Grid, Radix UI

Testing: Jest, React Testing Library, Cypress (unit, integration, end-to-end)

Build & DevOps: Vite, Webpack, Git, CI/CD, Azure DevOps, Jira

Other: WCAG accessibility, i18next (localization), PWA, JWT, CSRF, code splitting, lazy loading, virtual scrolling, ESLint, Prettier, Figma

AI-assisted development: Cursor, Claude Code

Familiar with (non-commercial projects): Angular, Vue

Practices: Agile, cross-functional collaboration, code review, mentoring, performance tuning

PROFESSIONAL EXPERIENCE

Senior Frontend Engineer — Rideo

Remote | December 2025 – Present

Technologies: React 19, TypeScript, JavaScript, Material UI, MUI X Data Grid, Redux Toolkit, TanStack Query, React Hook Form, Orval, OpenAPI, i18next, Jest, React Testing Library, Cypress, Git, CI/CD

B2B SaaS web application for Uber, Bolt, and Free Now fleet partners; sole frontend developer on a cross-functional team. The application is in production and used daily by a launch partner.

- Automated the weekly partner settlement workflow, cutting processing time from 5+ hours of manual work to 20 minutes–2 hours and extending automation to 5x more of the business process.
- Designed the frontend architecture: feature-based structure, Redux Toolkit for client state, TanStack Query for REST API server state.
- Generated a typed API client from the OpenAPI schema (Orval) and built a shared fetch layer with JWT auth, CSRF protection, 401 handling, and unified error reporting.
- Implemented multi-tenant logic, Polish tax rules (VAT, ZUS), and bulk Excel import with client-side validation.
- Implemented internationalization (EN, PL, RU) with i18next and established the quality baseline: unit and end-to-end tests, ESLint, Prettier, pre-commit hooks, PWA support, and product analytics (GA4, Microsoft Clarity).
- Optimized data-heavy tables and forms with virtual scrolling, memoization, and debounced filters; added client-side image compression.

Frontend Developer — LeverX

Minsk, Belarus / Remote | November 2023 – December 2025

Technologies: React, TypeScript, JavaScript, Next.js, TanStack Query, Redux Toolkit, Radix UI, Material UI, Vite, Webpack, Jest, Cypress, Git, PWA

- Led frontend architecture for React and Next.js (SSR, ISR) applications; established coding standards and code review practices.

- Standardized server-state (TanStack Query) and client-state (Redux Toolkit) patterns; improved performance through code splitting, lazy loading, and caching.
- Built a reusable component library on Material UI and Radix UI with design tokens and a WCAG accessibility baseline.
- Defined the testing strategy (Jest, React Testing Library, Cypress), introduced CI/CD checks and PR quality gates, and mentored junior developers.
- Projects: e-learning platform (SEO, SSR), resource-tracking dashboards, sports event PWA (offline support), B2B real-time chat (Socket.io).

Frontend Developer — EPAM Systems

Minsk, Belarus / Remote | April 2022 – October 2023

Technologies: React, TypeScript, JavaScript, Redux Toolkit, Material UI, Webpack, Azure DevOps, Git, CI/CD

- Delivered data-heavy React features end to end; refactored legacy code and improved TypeScript type safety.
- Optimized forms and tables with virtual scrolling, memoization, and debounced inputs.
- Established the testing pyramid and streamlined CI/CD pipelines in Azure DevOps; hardened security with CSP headers and XSS/CSRF mitigations.
- Projects: healthcare data management, operational dashboards.

Frontend Developer — MrSoft

Minsk, Belarus | March 2020 – March 2022

Technologies: React, TypeScript, Redux, Apollo GraphQL, Git

- Built the React UI for an electronic archives platform with GraphQL (Apollo) integration; developed reusable components and standardized linting across the team.

Frontend Developer (Contract) — Freelance

Remote | February 2019 – February 2020

Technologies: React, TypeScript, React Hooks, SCSS, Git, Figma

- Built a responsive e-commerce application (catalog, cart, checkout, 3D room preview) in close collaboration with a designer in Figma.

Frontend Developer — Elinext

Minsk, Belarus | May 2018 – January 2019

Technologies: React, TypeScript, Redux, Bootstrap, SCSS, Git

- Developed admin panel screens with REST API integration; organized the team's SCSS architecture.

EDUCATION

Bachelor's degree in Mathematics (Web Application Development)

Belarusian State University, Faculty of Mechanics and Mathematics — Minsk, Belarus | 2013 – 2018

CERTIFICATIONS

AWS Certified Cloud Practitioner (CLF-C01)

LANGUAGES

English — Upper-Intermediate (B2) • Russian — Native • Belarusian — Native
